

The School of the Natural Order
RESONANCE
Spring 2021

The Lesson

This exceptional lesson is from the series, *Description of the Psychic World*, titled, *The Golden Lid*. Here Vitvan references the use of the symbol *Golden Lid* as, “the brilliancy of the intellect, not emotional thinking, lower manas, [but] the higher manas, the brilliancy of the intellect.” Vitvan details the necessity for the purificatory process, the needed development of “a strength superior to its strength” to dethrone the censure within one’s psychic nature, and the eventuality of “pipping of the shell.”

Our school is delighted to again offer a week-long summer seminar featuring the Gnostic teachings as given by Vitvan. This July’s Summer Seminar 2021 is titled, *Understanding the Psychic Nature - A Beginning Step on the Path*. The seminar will begin on Monday July 26th and continue through Friday July 30th. As with last year’s summer seminar, classes will be offered via the zoom platform. Classes and presenters will be posted on the SNO website: www.sno@sno.org as they develop. Please see the attached page for further seminar description and details.

Here at the headquarters in Nevada we have multiple buildings, multiple rooms and dwelling spaces a-plenty. We have an outdoor expanse that’s just begging for creative attention. For several years the school has been slowly making incremental improvements within existing buildings, as well as around the extensive grounds. Dedicated students near and far continue to give of their time, physical energy and financial support.

There is a call in this Now for persons wanting something deeper...brave and tenacious souls with an inward focus yearning to explore what is greater than their ‘personal selves’. Individuals who are willing to dig in deep enough for the purificatory process to allow greater consciousness. Would you like to be part of the next step, part of a new cycle nucleus in the continuation of the School of the Natural Order headquarters here in Nevada?

The school, as positioned here at Home Farm in Baker, seems ready and open for the next group of world servers to assist in its revitalization of ‘place’. A nucleus of dedicated students, utilizing the highest and greatest in our individual selves, can’t help but reflect beauty, harmony and group functioning as it expands and surrounds us. Sharing talents in landscaping, carpentry, gardening, water management, creative design, etc., etc. invigorates body and soul as we progress on the path. Vitvan gave us the tools....Now let us *be* the roadmap.

Individuals with sincere desire to learn and/or further their studies in the teachings as given by Vitvan, as well as wanting to be part of the school’s foundation-building here at Home Farm, please contact us at: sno@sno.org. We welcome you. Namaste’
