

The School of the Natural Order
RESONANCE
Summer 2021

The Lesson

Offered from the lesson series *Description of the Psychic World* is Lesson 9-**The Purificatory Process**. Vitvan details the inner movement when one makes consistent contact with a higher influence, and the eventuation of that influence extending into the psychic nature. Vitvan offers methods to students in assisting the expurgation process of unwanted and unusable guna qualities. In this powerful and sobering lesson one has the opportunity for a deeper understanding of a natural order process.

Excerpts:

”There is nothing in your consciousness or my consciousness, there is nothing in the psychic nature, no matter how deeply buried, that is not going to be revealed, that is not going to come out on the periphery.”

”Meditate long and earnestly upon Light and Love. Just meditate, think of it and lift your forces. Try to *feel* it. Practice meditating on Light and Love until you begin to feel that influence (in your higher levels)– Light, buoyancy, peace and Love. Now I am talking about deliberately meditating upon Light and Love and then directing your thought, your attention, throughout your whole organism – psychic, etheric, and ‘physical’.”

“We are just turning away from the shadows. We are facing the Light and Love and filling ourselves with Light and Love. Then directing that to every atom, molecule, and cell. Don’t fight it! No more fight.”
