

The School of the Natural Order
RESONANCE
Summer 2020

Our lesson is from Practice of the Way - The Mental Level. Vitvan impresses the crucial need for one on the path to counter-act the powerfully ingrained habit within the race psyche of looking 'outside' oneself, and to disregard the use of all mental justifications, reasons and alibis. He asks students to train and endeavor to differentiate between the four levels upon which a given person, often simultaneously, functions. Vitvan reminds us that within the evolutionary status, man has just barely come into his adolescence. He speaks of the way a purified (or relatively purified) psychic nature functioned before the cortex was developed. There was no fear, no worry, no apprehension. One lived without analyzing it. "Which of you by taking thought can add one cubit unto his stature?"

Summer Seminar 2020 is a go here at the school! We are in process of fine-tuning the technology for bringing fresh and dynamic classes to you next month. Please see the attached Seminar 2020 page for more details.

Out of necessity, our collective and private worlds have shifted into an unprecedented movement of adaptability, creativity and coalescence. Like most of you, those of us here at the School of the Natural Order in Baker, Nevada have sequestered during the past months and are just now carefully moving around in a "safe-distancing" kind of way. On a limited basis and under thoughtful guidelines, we are now opening the school up to students who would like to come visit and perhaps stay. We welcome you! Come and breath the stillness that is within each of us.

*Build you a temple in your consciousness upon the rock of Faith,
And by your works make your life a monument of Beauty,
Whether the world knows and enjoys it or knows it not,
This, in effect, represents the eternal
As well as the universal significance
Of Faith.*

-Vitvan
